### Create a Passport

To have a successful trip around the world, you'll need a few important tools. The most important among them is a passport. Follow the instructions below to create your very own passport to use on your international travels! Don't forget to record every country you visit today by drawing their flag in your passport!

#### What you will need:

- Construction paper
- Printer paper
- Stapler
- Crayons or markers
- Pencil
- Stickers to use as stamps – they can be as simple as stars or smiley faces

1. 1 sheet of construction paper and several sheets of printer paper. Fold them all in half (hamburger style) slipping the printer paper into the construction paper to make a 8 ½ x 5 ½ booklet. Help them staple it all together.
2. The first page of the passport is for your identifying information. At the top of the page draw a self-portrait – serious or silly. Beneath that, write your name, height, eye and hair color, birthplace and current address.
3. Label each page for a place where you would like to visit (such as the Great Wall of China!).
4. After each activity, write what you enjoyed most or learned about that place. When this is done, stamp the page by adding a sticker at the top.

Activity from education.com

### Virtual Tour - The Great Wall of China

While not truly a singular structure, this series of fortification systems runs across the historical northern borders of China. Built to hedge against invading nomadic tribes and to unify the upper limits of the empire, construction began as early as the 7th century BC and continued throughout centuries and dynasties to the 1600s. The remaining portions of the Wall stand today as a testament to the power and determination of historical China. The Great Wall of China is an amazing structure to experience yourself, and even if you can't really see it from space, you can see it today from your living room! Follow the link below for a 360 degree, virtual tour of the Great Wall!

## What's the Weather?

Look out your window. What is the weather like today? Is it cloudy? Sunny? Rainy or Windy? Did you know that the weather is different in different places? All around the world, it might be windy while it's calm here, or even sunny and warm while it's chilly and snowy here! Use your computer, tablet, or phone to look at the weather in other countries around the world! What is the temperature right now in Belize? What about Norway? Is it raining right now in South Africa? Could you have a picnic in Korea, or would you rather stay inside with a cup of tea? Don't forget to record your travels in your passport!

---

## Daily Challenge - If You Build It...

The Kings and Queens of old built incredible monuments to immortalize their successes and solidify their right to rule throughout the ages. From endless walls to towering castles and soaring cathedrals, all of these structures were meant to inspire awe and loyalty in their kingdoms and empires. Your challenge today is to build your own magnificent structure using materials you have available at home - legos, building blocks, play dough, paper, even furniture and blankets! Once you have your castle to preside over, be sure to post pictures in our daily thread!

## Try out Pottery

Pottery is one of the oldest human inventions and to archeologists is indicative of the transition of a society from a hunter-gatherer lifestyle to one which established agriculture. The creation of pottery is an almost universal experience for early cultures across the world, and remains of pottery can be found in archeological sites from the Americas to the Far East.

The creation of pottery and use of clay or putty as a relaxing agent is also well known and documented in the scientific and health world. The repeated pattern of squeezing and releasing clay or putty in your hand can alleviate tension and stress. Use materials available to you, such as clay, dough, or putty, to create your own pottery. You can make pots, plates, bowls, even figures! Anything goes! Make sure to post a picture of your creation in today's thread!
